

## PUBLIC NOTICE:

The East Kern Cemetery District Board of Trustees have determined that the niche structure located in Section F at the Mojave Cemetery, is dilapidated and in need of replacement. The niche structure has suffered damages, beyond the control of the District, that may have a material effect of its structural integrity. The District has ordered a new niche that will replace the current niche and will not include any expansion. The new niche will replicate the current niche with the same inscriptions, location and colored shutter (niche plate). However, it will be necessary to remove and re-inter the cremated remains, from the old niche into the new niche, in the exact order as they currently exist and stand upright not slanted. We understand this could be an emotional moment and the District will perform this task, as delicately and respectfully, as possible. This task is expected to take place the week of November 3, 2025. If you have any questions, please contact the District Office located at: 2040 Belshaw St., Mojave, CA 93501 or call: 661-824-2778
